

## **product information: plates made of plastic**

Safe, efficient, economical: Crane support plates are made of PE 500 plastic. They are flexible and versatile in use for up to 90-ton loads. Plates are characteristic for their low weight, easy handling and absolute resistance to rot.

### **benefits at a glance:**

- easy to handle and light-weight
- very low costs
- stable
- tough and virtually indestructible
- very long service life
- water-repellent, no rusting, no rotting
- splinter-proof
- standard carrying handles
- easy to clean
- uniformly black

### **You want more?**

Upon request, the following features are available:

- customer specific dimensions
- bevelled edges
- stainless steel carrier chains
- engraved company name
- Center recess to take up the crane outrigger as a safety against lateral slipping
- delivery of exact boxes for assembly under the crane truck

**sizes: plates made of plastic**

L x B x H in mm	Stützkraft	Gewicht / Stück
400 x 400 x 30	8 to	5 kg
